---

Leylah,

Attached is the credit workbook for DeBary as requested. Note that the education credits were updated to reflect the starting load minus the non-contributing basins. It is still additional credit above what they were receiving last year for education and ordinances. I also ran the new materials collected amount of 150 cubic yards (out of the original 370 cubic yards submitted) that fell within the contributing area. Let me know if you have questions.

*Tina Gordon*
