---

I don't think I forwarded this to you the other day. See below reference to the city confirming they will receive 1/3 credit for WS-01 unless something changes after discussion with the other two entities. Just wanted to make sure everyone has that notation for future reference.

Thanks,
Tina

Hello Tina,

Please refer to responses in **blue text below**, which summarize coordination efforts with City staff regarding your review comments.

Regarding WS-01: **We understand that the City will receive 1/3 of the full credits. I will let you know if the City's position changes after further coordination with Seminole County and City of Oviedo.**

Regarding WS-09: **Based on coordination with CDM, it has been confirmed that the revised TP and TN reductions are as follows: 293 lbs/yr (1,483-1,190) and 1,008 lbs/yr (7645-6637). Please refer to the attached Section E Addendum and back up calculations (first tab - Excel file), which correspond to the computations submitted to FDEP for permitting purposes.**

Regarding your comments on what is eligible for BMAP credits and what is ineligible.

- Sanitary sewer maintenance is generally used in bacteria BMAPs and is not eligible for credits.
- Weed control activities are not approved for credit.
- Stormwater pond maintenance and restoration is not eligible for credit as it is a permit condition which is expected to have regular maintenance.
- Stormwater pipe relining is not eligible for credits.

Understood. No credit to be issued by FDEP for these types of projects. The City would still like to have the project listed in the master spreadsheet please.

The following is eligible for credits, but requires supplemental information to calculate the credits.

- BMP cleanout – please send the weight or volume of materials collected. **8.3 cubic feet of materials were collected**

- WWTF Upgrade – we can leave these credits as TBD for now. When construction is complete we will take the delta between the pre-upgrade discharge and post-upgrade discharge loading. **Yes, please. The City would like to leave the status as TBD for now.**

Please let me know if there is anything else you may need to complete this effort.

Thank you,

Leylah

Leylah,

See the highlighted passage below from Bryant Fields confirming that the city is working with Seminole County and Oviedo on sharing the reductions for WS-01. I also forwarded you the response from Kim Ornberg and Amanda Kortus (Seminole County and Oviedo respectively) that I had in my email records. I know that Winter Springs has lost the two staff members who were previously involved in this discussion. We will leave the credits as is for now while this gets sorted.

For WS-09, the only materials we were provided were for the pre-construction estimates. We need the documentation on how the proposed loads submitted this year were calculated. The CDM Smith work did not utilized the modeled attenuation rates.

Tina

Moira,

I don't see the updates to WS-09 that were requested back in September. We are working with Seminole County and Oviedo on the WS-01 for the sharing of those reductions.

WS-09 should have had the TN and TP increased to 1228 and 304 lbs/year, per the memo from CDM Smith in the attached email. This was completed in 2018.

Subject: Lake Jesup BMAP Project Updates for Statewide Report

Good afternoon.

The department has begun preparation for the next Statewide Annual Report (STAR) to be submitted July 1, 2019 to the Governor and Legislature. This annual report of progress towards implementing water quality and quantity projects will greatly assist policymakers and local stakeholders in keeping track of the myriad of restoration strategies, fulfilling the requirements of Section 403.0675, Florida Statutes (F.S.). As part of the STAR, we will include updates on the status of the BMAP projects through December 31, 2018.

Updates on the status of BMAP projects in the Lake Jesup basin have not been requested since project updates, and comments on projects, were accepted through September 2018 for the Lake Jesup BMAP Amendment document. As a stakeholder of this basin we are requesting that you please review the project table for your entity (Appendix B. attached) and either:

- Confirm there are no further updates, or
- Request a project table so you can provide additional updates. These updates will not appear in the adopted BMAP Amendment document, but will be used for the 2018 STAR.

Please submit all information to me by Tuesday, January 15th so that the draft report can be prepared.

If you have any questions, please feel free to contact me at Moira.Rojas@dep.state.fl.us or (850) 245-8460.

Thank you; and Happy Holidays!
Moira
