Marcy,

Where are we on verifying Maitland's projects for Jesup? Their contractor has a meeting coming up to prioritize their construction projects for the upcoming year and they would like their credits to be a part of that discussion. For them we have the Lake Gem alum injection system project, the two OSTDS projects, and a BMP clean out project that just needs attenuation. I told their consultant that our deadline is the 28th, but that I would check to see where we are at.

I will be leaving town Friday morning but I am copying Tiffany and Moira. Whenever you have that in if you could reply to all of us and we will make sure they get their final project table.

Thanks,

Tina Gordon
