Tina,
I don't think an ArcNLET model has been completed for the area. The model does include some estimates that we could use, which is an approach we used for the Longwood projects. (I've copied Moira to see if she is OK with this approach). I would just need a map showing the location and a count of the number of septic systems.
Thanks!
-Marcy

Marcy,

Maitland has submitted OSTDS Phase Out projects but indicated they did not attempt to calculate credits. Do you know if ArcNLET has been run for that area? If not I will need to get back to them to let them know that needs to be done to calculate those reductions (unless the model includes estimates for reductions of septic per system).

Thanks,

Tina Gordon
