Subject: COMMENTS ON TODAY"S TRIENNIAL REVIEW WITH FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION
Date: Wednesday, May 15, 2019 3:07:40 PM

Good day Miss Kaitlyn

Today I assisted to the above mentioned group on the Triennial Review, I went with the expectation to learn more about our water issues.

I did not spoke about the subject because I don't know anything, I only have few comment, one is how I felt, I felt that the group that spoke on behalf of the FDEP have their investigations tied up,

The issue of the water will continue until, drinking water becomes a privatized industries and make more rich some of the corporate elite, our Government officials do not see it that way but that is my feeling. it is only a comment.

I can see how man is so hungry for assets and power. Drinking or safe water had been a subject that for long time they are looking to have control and take it away as a Natural gift to humans.

Our lake Okeechobee needs inflow of clean water to be able to discharge clean water, lake Okeechobee have been a source of water for years but the inflow of dirty water had been a huge problem for many counties in our beautiful State of Florida.

Thanks

W. Montes
