On the field sheet I am seeing 1300 CST noted for that station.

Hi Mike,

I am working on uploading micro results from UWF and for RQ-2018-08-13-15, field ID 3302JE20, the sampling time has been scribbled out and a very tiny sampling time written in its place. It is so hard to see! I pulled up the corresponding COC turned into the DEP lab, and the sampling time is 1300 on those. The samples were collected by Escambia County, a D. Martin I believe. I would just like to confirm for the record that that 1300 sampling time is correct. I just need something, like this email, to keep with the records if someone else asks.

Thank you so much!
