---

Hi Ben,

I'm uploading the micro results from AEL Tampa for RQ-2018-07-09-04.

On the Tallahassee lab submittal sheets, G2SW0041 and G2SW0015 are scheduled for enterococci. G2SW0040 is scheduled for both e. coli and entero.

On the AEL chain of custody I only have G2SW0029 scheduled for entero and no sample for G2SW0015.

I will change the test codes in LIMS to match what was run at AEL.

To confirm what will be in LIMS→WIN:
G2SW0030 e. coli
G2SW0031 e. coli
G2SW0029 entero
G2SW0040 e. coli
G2SW0041 e. coli
G2SW0015 cancelled

I've attached the submittal forms for your review. Thanks!
