Hey Kara

We did not sample the G3SD0103_DUP it must have been a accident if the box was checked on the lab submittal form. If you could please let PCR lab know and we will fix this issue in the future.

Thanks Gary

Hey Gary,

Can you confirm that it was G3SD0103 that was dropped off to Benchmark? The submittal forms turned into our receiving indicated that both G3SD0103_DUP and G3SD0103 were dropped off. However, the bottle groups do indicate that only G3SD0103 was dropped off. Also, it looks like for the DUP, PCR was scheduled but if only the non-dup sample was given to Benchmark, there is no corresponding micro. I can let the PCR lab know. Just wanted to make you aware. I'm not sure if I should let anyone else know.

Thanks,

Kara
