The COC was collected at 1500 and the duplicate was collected at 1505.

I apologize for the confusion.

Thank you for bringing this to our attention.

I also just realized that the COC dropped off to Pace has a sampling time of 1505 for the G4SE0023_DUP but the sampling time is recorded as 1305 for the samples dropped off to Tallahassee.

Let me know which is correct.

Thanks!

Subject: RQ-2018-09-10-27

Hello,

I am working on uploading the micro samples from RQ-2018-09-10-27 that was dropped off to Pace. There is a discrepancy for the sampling time for field ID G4SE0049. The COC dropped off to Pace says that the sample was collected at 13:00 but the COC dropped off to the DEP Tallahassee lab says it was collected at 1500. The COC dropped off in Tallahassee originally had a 1300 sampling time but was crossed out to 1500. Which is correct? Thank you!

Kara
