Hi, Kara :

We were actually able to meet up with Flowers Lab while they were doing sampling in Key West, and they drove the samples up to their lab in Marathon; I think the multiple relinquished date/times are because 1230 was when they received the samples from us, and 1500 was probably when their lab technically received them.

Subject: relinquished/received date

Hi Maryann,

Can you take a look at this chain of custody? What are the multiple relinquished/received time for? Four of them are all the same time too with one being what looks like an ultimate received date/time but it doesn't have a corresponding relinquished date/time.

Thanks!

Kara
