I think I'm dreaming about this report now!
Yeah, I'm sending revised everything now. I think we got caught up on the dilution that we didn't notice there was an incorrect sample date as well for -005, 006. Not sure if that didn't carry over the changes from not catching it or due to a LIMS system error that occurred last week so I'll just attach a whole new revised report and EDD in just a minute for you.

Morning!

It looks like field ID G3SW0052 mistakenly got logged in as G2SW0052. Can you change that on the report the send a revision? No need to send an updated EDD, I can just change it manually. All the other field IDs were G2SW... so this one just slipped through too.

Thanks!

Kara

Please find the attached Revised analytical report and spreadsheet:

19041339_20190429 Revision 2
19041339 RQ-2019-04-22-05 REVISION 2
19041339_20190429 Revision 2

The following revisions were made:
-Result of 19041339-005 Fecal coliform was changed to 10B to reflect the replicate result that was higher than diltion series (result of 5B).
-The supporting spreadsheets have also been updated to reflect the above listed change, as well as changes to the MDL, PQL, and Dilution factor columns.

Thank you,

Kara Peterson
