I'm not sure what Cheryl means when she says 'and they failed to convert to ET, plus taking time from UWF submittal..unconverted to ET as sample time.'

But, it sounds like the 13:55 CT sampling time is correct?

I noticed while entering the data today that G4NW0528 wasn't in LIMS as well. I put a note in the datatracker. To me it looks like whoever entered the data into LIMS didn't notice the second page on the cover sheet possibly. As for the time discrepancy Lisa mentioned, I'm not sure what she means there. Cheryl do you have any ideas?

> Hey,
> There are a couple of discrepancies in this report:
> There is a sampling time issue that looks like it was logged into LIMS incorrectly. Ignore the blue highlight in the LIMS screenshot. Also, the line highlighted doesn't seem to exist in LIMS. It's on the submittal form as having been sampled so I'm not sure what happened. Maybe G4NW0528 is under a different event ID?
