Hello Abigail,

Apologies for the confusion. G1SW0109 is the correct sampling location for the sample collected at 10:05 4/20/21. The confusion for fresh vs marine was an assumption error. These WBIDs are listed as tidal/marine WBIDs but on this occasion the conductivity was <5000, making them fresh. We will ensure these are correctly identified on future COCs.

Thank you,
Sarah Meyer
SW ROC

Subject: RQ-2021-04-19-20 discrepancies

Hi there,

Good afternoon! I want to ask about a couple discrepancies between the DEP COC and contract lab COC for samples collected for RQ-2021-04-19-20 on 4/20/21.

Can you confirm the correct field ID for the sample collected at 10:05? The DEP COC says G1SW0109 but the contract lab COC says G1SW0099 so I wanted to check with you.

I also noticed that G5SW0169 and G5SW0170 both have the matrix listed as fresh water on the DEP COC but marine on the contract lab COC.

I'm attaching both COCs here, please take a look and let me know what you think.

Thank you for your time,

Abigail
