This RQ is correct. Microbio samples only. These samples correspond with bottle group C. Please cancel all additional analysis that would go along with bottle group C. If there are any other questions I will be by my desk.

Hi Drew,

I think you collected these samples that were dropped off to Pace. It doesn't look like there are any corresponding samples that were sent to tally for this event. Is that right? I just want to make sure because this same RQ has an event from the end of January. Are you sure this is the correct RQ to make an event under?

Thanks, Kara
