Don –
I downloaded the full report and searched on "Sulf."
The attached versions shows where the report mentions sulfate/sulfur (highlighted in yellow). They do call for construction of a mass balance for S in the ecosystem; and in one of the appendices call for surface water sulfate monitoring (I think).

There is a strange section of SO4 removal by the STAs that says we noted significant reduction of SO4 across the cells…. That's not right.

Do you have a time when you want to talk? My day tomorrow is looking fuller and fuller, so Th and F will be better for me – Cindy

Sept 29, 2008 NRC Report on Everglades restoration; as near as I can tell, sulfur gets no mention.
