Don - the revised report works for me, and you should proceed with submitting the invoice, etc. to F&A.

When you spoke with Cindy, what was the intention on draft database submission? I am curious as to organization of the database, the fields of data it contains, etc. We need to be able to review and comment from that perspective well before it is gets towards completion to make sure everyone is comfortable with the fields of information it contains.

Thanks,
Denise
