Hello,

Attached is the report for the S21050126 with the shortened comment on the C qualifier as you requested. Please let me know if you have any questions.

Thank you,
Melinda Merchant

Good afternoon Abigail,

The Laboratory Director at our North Port location will have to be the one who makes the adjustment to the report, as I don't have the correct report format to do so myself. Melinda, are you able to send Abigail a revised report following her request?

Thank you,

Hi Kelsey,

Good afternoon. I wanted to tell you that since there is a J3 and a C qualifier for S21050126-003, we

must report both comments in their entirety, so it looks a little wordy on our end:

> "Estimated value. Quality control criteria for precision or accuracy not met. Sample result was 148 #/100mL and the duplicate result was 41 #/100mL which did not meet the laboratory precision criteria."

If you wouldn't mind, could you edit the comment, perhaps removing the portion underlined above? If that is how your lab prefers to report results in this scenario, then it's okay. I just wanted to see what you think.

Thank you!
Abigail
