My apologies, I misunderstood your question. The micro overflow lab did not receive samples for the duplicate or blank—they only received 3 E. coli and 1 Entero samples that are associated with the four sites visited. I thought you were clarifying if the microbiology was submitted to them.

Please let me know if further clarification is needed. Thank you for checking!

Okay thanks for all your help. The report and chain of custody that they sent to us were missing these two sites, so I wanted to double check before reaching out to them. Have a great day!

Thanks,
Anthony

Thanks Nicole, and this applies to the overflow micro samples as well?

Hi Anthony,

Yes, there should be both a field blank FB_10082019 and duplicate G3SD0089_DUP. Thank you for verifying with me.

Best,

Subject: RQ-2019-10-07-74 Sampling

Hello Nicole,

For RQ-2019-10-07-74 there doesn't appear to be a field blank or sample duplicate on either the report and chain of custody, but it looks like receiving received and logged in FB_10082019 from NorthCreek(Tidal) and G3SD0089_DUP. Would you be able to verify if the field blank and duplicate should be in the report and chain of custody? Let me know if you have any questions.

Thanks,
Anthony
