Don - Please note my changes on the attached.

Also, my earlier comment on the deliverable is because I believe more detail is needed. More detail is warranted that indicates what progress has been made on the database and the literature synthesis - e.g., data from whom, information on compiling it, the literature list being synthesized to date.

Also, from my notes from *here* (may not be what was finalized), I show that a first draft data set was a deliverable for December 2008.

At a minimum, we will need that sort of information to inform a meaningful meeting this month. I want to discuss this deliverable with you before this invoice is processed for payment.

Denise

John,

I took the EO etc. numbers you previously gave me to fill out the attached - "Invoice Approval Form SP676 Smithsonian".

Are these numbers still OK?

Don
