Renee,
Let me know if you need assistance getting this invoice out the door for payment. We can't hold these up due to prompt payment requirements. Has Don provided the hardcopy?

Subject: FW: 1st quarter report

Renee,

See the Email below and the attached "1st quarter report" (doc) for contract SP676, the Smithsonian specifies they have completed the first 30% of work on Task 1 and 20% of work on Task II.

This is a fixed price contract so we can pay the Smithsonian based on this first invoice, those proportions of the funds specified for each task.

Please see the attached PDF of DEP Contract No. SP676, Attachment A, Page 2 of 3, and Page 3 of 3

Task 1 Total Cost: $98,790; 30% =	$29,637
Task 2 Total Cost $34,793; 20% =	$ 6958.60
Total invoiced:	$36,595.60

As well, note the anticipated completion by October 1, 2008, 30% of work on Task 1 and 20% of work on Task II, on Attachment A, Page 3 of 3 (We started this contract a bit late)

I am satisfied that we can authorize payment of this invoice.

Please help me in obtaining payment for the Smithsonian.

Don

Don -

As required by our current contract, attached is a report for the first quarter of the study.

My time has mostly been spent compiling and cleaning up data from my lab (a very satisfying task which is nearly complete!) and beating data out of Bill, George and Dave. Both Dave and Bill now use databases for their data; Bill's group constructed a data base from all of their FL data; Dave's group has a giant data base of all their Hg and MeHg analyses, from which we are extracting the FL data. George is the last holdout.

We are working on how to structure the final data base that will be available for public consumption; where to eventually post it on the web (probably both SERC and USGS); and all the details of what to include in the data base and how to report QA/QC. I have another PI at SERC who has more expertise in databases helping me (Fritz Riedel).

Thanks - Cindy
