Subject:	Sulfur Article in Earth Magazine (formerly Geotimes)
Date:	Tuesday, February 03, 2009 1:54:10 PM

Ronnie et al.:

The article I wrote on sulfur in the Everglades for Earth Magazine is now out in print in the February issue. This magazine was previously called Geotimes. They have changed it to appeal to a more general audience. Needless to say, they (the editors) jazzed up my original article to appeal to a more general audience. So please excuse the hyperbole, especially in the opening paragraph and the title.

Bill
