Subject:	GOMA Hg Monitoring forum
Date:	Monday, April 06, 2009 1:19:30 PM
Attachments:	key slides.ppt

I realize that none of you will likely have the time to comment on such short notice but I have attached 5 or 6 key slides that I am presenting at the GOMA Monitoring forum tomorrow or Wed.

I was tagged w/ the presentation late – my objective was to produce an overview for the nutrient and HAB groups to spawn some intergroup collaborations.

I also thought of giving an overview of the South Fl Mercury Sci program – heavy on the monitoring aspects (lot of slides not included here--- I think samples can be collected by trained and interested personnel involved in other programs)– mentioning some of the intra-agency methodological differences and lessons learned.

If you have a couple of minutes – please review and offer comments by mid-day Tuesday; I will have time to make changes during the breakout session.
