Dear Cindy and Don:

Happy Chanukah and Merry Christmas to both of you. Hope you both have a great holiday and much success in 2009. I just wanted to let you know in case you missed the email that the book chapter on sulfur is now a journl article for a special issue of "Critical Reviews in Environmental Science and Technology". This is probably good in terms of reaching a broader audience, but it also limits the space we have. The papers are supposed to be 30 pages (double spaced), so you will need to keep the sulfur distributions (Cindy) and management of sulfur for restoration (Don) sections to about 5-6 pages including tables and figures. I have sections 1, 3, 4, and 5 in pretty good shape. Once I get what you have put together I'll start on the conclusions section. Thanks for your help on this.

Bill
