Don:

I agree that having something in on sulfur is important. Out of sight, out of mind! What is the time frame on this? I may have some new surface water sulfide data from northwest WCA 2A by the middle of August, and porewater sulfide and nutrient data from there as well. I'd be happy to include that.

I was out last week, so I'm just catching up on things. I called Shaun McGlenn (sp?) from DEP back about his sulfur question, but did not get him. By the way, I thought SFWMD couldn't travel, but I heard that Mark Gabriel was at a recent wetlands meeting?

Subject: FW: updates for SFER

Cindy, Bill, Dave,

From the Emails below you can see that Mark Gabriel (SFWMD), who will be lead author on this year's (2010) mercury and sulfur chapter of the SFER, wants me to write him some updated text on Everglades sulfur.

The text from last year's SFER chapter 3B is attached, and that plus what you and I wrote in the SFERs in the couple previous years pretty much covers the research you have done, apart from that you have yet to publish (Cindy's ACME report, Bill's chapter for Ramesh; Dave's analysis of water delivery changes to 3A-15).

I do not want to eliminate the sulfur section of this year's SFER, and I guess I can do a synopsis of your sulfur findings as in the last 3 year's of SFERs plus describe what is in progress and list data needs (e.g. S budget; EAA soils S release rate and original S source to EAA soils).

Any thoughts; suggestions?

Don

Don,

I am just touching base on my question below. Any idea when you can have this ready?

Thanks

Don,

Can you provide an update on text in the attached document for Chapter 3 for SFER 2010? It's not much, just some background info. for the Sulfur section and updates on two of the research projects.

Thanks
