	Spring 2019	APTI 455 Inspection of Gas Control Devices and Selected Industries (3 days) (Dr. Crowder)	Yes	SWD Office Temple Terrace		DARM - OPC	Training	TBD	Training provided for core competency needed to inspect gaseous control devices (e.g., absorbers, oxidizers, condensers, flue gas desulfurization, and nitrogen oxide control systems.	No	Yes	Division - lodging Districts - meals/ per diem	TBD	TBD	This course presents fundamental procedures for the inspection, problem diagnosis and compliance evaluation of gas control devices and significant industrial processes. Site-specific information is used to identify shifts in operating variables that indicate a potential for increased emissions. The baseline inspection approach is reviewed. Operating principles and inspection techniques for gas control devices (absorbers, oxidizers and condensers) and specific control applications (flue gas desulfurization and nitrogen oxide control systems) are presented. Process descriptions and inspection issues are also discussed for fossil fuel fired boilers, waste incinerators, iron and steel processes, and asphalt plants. Written and video case studies are used to reinforce the material.
No Cost Webinars provided by the Division															
AIR	Fall 2018	AirCom Training (1.5 days) Webinar	No	Webinar		DARM - OPC	Training	TBD	Training provided to Districts/Local Programs for core competency in the AirCom permitting and compliance data management system.	No	Yes	n/a	n/a	n/a	Training on the redesigned compliance assurance interface of the ARMS database. Upgrades include new reports and functions.
AIR	Spring 2019	AirCom Training (1.5 days) Webinar	No	Webinar		DARM - OPC	Training	TBD	Training provided to Districts/Local Programs for core competency in the AirCom permitting and compliance data management system.	No	Yes	n/a	n/a	n/a	Training on the redesigned compliance assurance interface of the ARMS database. Upgrades include new reports and functions.
AIR	TBD 60 minutes	Intro. to HAPs	NO	Webinar	District OER staff (as needed)	DARM - OPC and OBP	Training	TBD	Training needed for core competency.	No	Yes	n/a	n/a	n/a	This is an introductory course to the regulation of hazardous air pollutants (HAPs), the National Standards for Hazardous Air Pollutants (NESHAPs), and the Maximum Available Control Technology, and related guidance.
AIR	TBD 60 minutes	1990 CAAA Amendments	No	Webinar		DARM - OPC and OBP	Training	TBD	Training needed for core competency.	No	Yes	n/a	n/a	n/a	This is an introductory course that summarizes the primary requirements of the Clean Air Act Amendments of 1990. It focuses on the Title V air operation permit program, the New Source Performance Standards (NSPS), the Part 61 NESHAP, the Part 63 NESHAP, Compliance Assurance Monitoring, etc.
The Division will pay the registration fee for District OER staff requiring the TREEO Asbestos Inspector or Refresher trainings listed below. Districts are responsible for paying all registration and travel costs for non-OER Subject Matter Experts attending these trainings.															
AIR	TBD	TREEO Asbestos Inspector (3 days)	Yes	Gainesville	District OER staff (as needed)	DARM and Office of Emergency Response (OER)	Training & Certification	TREEO	Training needed for core competency on the federal asbestos NESHAP, safety procedures, and sample collection procedures.	Yes. EPA Performance Partnership Grant 105 section	Yes	Division - registration ($650/ OER employee) Districts - travel costs	TBD	TBD	The Office of Emergency Response (OER) has the responsibility to perform on-site inspections since they are covered by medical monitoring. This course provides training on the federal asbestos NESHAP, safety procedures, and sample collection. The OER inspector will coordinate with the District's CAP asbestos NESHAP subject matter expert (SME) when responding to complaints and conducting other on-site work. The Division is paying the registration fee, which is $650 per employee. Districts will pay travel costs for OER staff. The OER responder must pass the test to be certified.
AIR	TBD	TREEO Asbestos Refresher (1/2 day)	Yes	Gainesville	District OER staff (as needed)	DARM and OER	Training & Certification	TREEO	Training needed for core competency needed to maintain certification.	Yes. EPA Performance Partnership Grant 105 section	Yes	Division - registration ($650/ OER employee) Districts - travel costs	TBD	TBD	The OER responder must complete this half-day course on the federal asbestos NESHAP once every two years and pass the test to maintain certification as an inspector.
Districts are responsible for paying all registration and travel costs associated with the below training.															
AIR	TBD	Smoke School Lecture Course plus Field Certification	Yes	Statewide	Each district must maintain a minimum of one certified employee	District	Training & Certification	Misc. Vendors	Training needed for core competency to conduct visible emissions observations during complaints or at regulated facilities.	No	Yes	Districts to pay all costs	TBD	TBD	This lecture course trains the inspector on how to conduct and document visible emissions observations for determining stack opacity in accordance with EPA Method 9. The classroom portion (1 day) should be completed every 3 years. The filed certification portion (1-2days) must be completed every 6 months to maintain certification.
