Cindy,

My regards to Tyler.

I was in Detroit Weds - Sun last week visiting family; why else would I visit Detroit?!

I have a Monday deadline for the SFER and will be close to getting a draft done. I sent you some stuff Dan Scheidt brought to my attention about NW WCA-2A SO4 increasing ca. 10-fold with hydropattern restoration, using water from STA-2. I will admit some anxiety about putting that info in the SFER, as we know how welcoming the SFWMD and FDEP are re "bad" news (aka "the truth").

Remember to speak to Bill Landing sometime, as in our recent discussions with the Gulf (of Mexico) Alliance - who are considering our GoM Hg proposal for funding in 2010, we promised to measure MeHg production rate (incubation of cores, etc.)

Don

Tyler cut his fingers a bit while removing some field gear from our marsh site. No permanent damage, but we wanted to make sure he would be covered if they got infected.

Our first paper on MeHg production in salt marshes just got accepted at JGR-Biogeosciences. Carl Mitchell has been a VERY productive post doc. Sorry to say he has just left for a professorship at U. Toronto. If you are looking for Hg reviewers, he is a good one!

Were you out sick last week? Hope you are doing better if so.
I spent a day out last week with my 17 year old – got her wisdom teeth out.

Thanks Don. Too much hassle.
I spend a couple hours today already dealing with injury paper work.
Sigh.

Cindy,

I have been away for 3 days, and after much checking today, I believe the contract was sent to you last Friday.

If you do not get it today, please contact me.

Don

PS
Next you are going to ask me to whom it was sent?
I told all here to send it to Ruth Tallman, which means there is a 50% chance that that happened……

Hey Don –
Ruth Tallman and our OSP don't seem to have gotten the signed contract from FL DEP yet.
Do you know if it's been sent, and when?

Sorry for the hassle – Cindy
