Cindy,

See Email from Denise Miller below.

See pp. 9 and 10 (Att. A pp. 2 and 3) in the attached:

Teleconference(s) with the Department to discuss and refine metadata and data
organization needs. Initial teleconference within the first month of the Contract,
other teleconferences scheduled as needed.
WE REALLY NEED A TELECONFERENCE ASAP; FOLKS HERE HAVE ALMOST FORGOTTEN ABOUT SULFUR!!!!

Quarterly progress reports

o Deliverables and due dates:

1. Detailed report, to be integrated with the ACME data report from Task 1. To include a synthesis of the literature on methylmercury production with a detailed focus on studies of the relationship between sulfate, sulfide and MeHg.

• Draft report, April 1, 2009

• Final data and literature synthesis report, June 1, 2009

2. Attendance at the Department workshop to present data and conclusions and receive comment
on the integrated data and literature synthesis report, and if necessary revise report.

• Attend Workshop, April 2009

Also
Feb/Mar. 2009 attend meeting with the Department (in) Tallahassee regarding work products

Well, will you have a draft report, April 1, 2009? (I forgot to talk to Dave K.)
When are you available in April for a sulfur workshop? Provide as many dates as possible, or tell me when you are NOT available.

Subject: RE: sulfur workshop

My two cents worth today. The last time we met in Russ's office (you, me, Frank, Russ), Frank agreed to ~April. I assume you are asking him to propose/spearhead planning for specific dates asap? If so, and since we definitely want Cindy there, do you know what Cindy's current availability is, and when we expect a report deliverable from her. Those pieces of info will help in planning. If her report is on schedule and depending on when the draft is due (I thought sometime in April, but something more discrete would help here), I would think we would want to plan this for one of the following scenarios:

Draft report provided to FDEP for initial review, with Cindy presenting on it during workshop. We could get feedback from the presentation to add to our comments in prep for a final report.
Draft report provided to FDEP in time for initial review and sharing with workshop participants in advance of the workshop as well, to aid in discussions during the workshop - my preferred approach, since more information is always better.

Depending on timing of draft report, etc., I imagine the possibility that the workshop might be in early May, rather than April.

At any rate, this level of information, if not already provided to Frank, would be useful to provide to him for planning purposes, and will demonstrate the need for starting scheduling soon.

Frank,

We should try to schedule the second annual sulfur workshop as discussed for April 2009; I spoke to Cindy Gilmour and her calendar is starting to fill up.
