Don –
Bill, Dave and I are on the phone discussing who will talk about what at the meeting right now.
We (me and my entire lab) are spending all of our time trying to finish up the DB this week. We hit 16000 lines of data today…. Still have most of Dave's and George's data to enter!

Charley has not replied. I sent another email to him today, but it's really getting too late to arrange this .

Cindy, Bill,

Could you please add titles for your, George's and Dave's seminars and suggest how much time you need to present.

Any reply from Charlie Driscoll?
If not, should we try for someone else re S and Hg methylation rate?

Don

PS
I am in Canada May 29 through June 7.

Don,

Attached is the most recent attendee list.

I suspect it would help to have a conference call (you, me Bill, Frank?) before you leave so that we can square away the final agenda.

Thanks
