EXPLANATION:

Survey Date: September 23, 2020

Water level was 142.28 ft NAVD 88

at the time of the assessment.

Submerged Aquatic Vegetation was analyzed from collected sonar data.

The height of the SAV where present is shown in 0.25 foot increments.

DATA SOURCES:

2019 aerial photography provided by ESRI.

Lake perimeter digitized from ESRI 2019 aerial photographs.

All contours generated by the USF Water Institute from survey data collected by USF Water Institute Lake and Stream Assessment Program

SAV STATISTICS:

Area 137,793 square ft; 3.2 Acres;

(0.64% of Lake Surface Area)

Mean SAV Height 0.17 ft;

Volume 24,046 Cubic ft, (179,878 gallons); (0.02% of Lakes Volume)
