Totals	39,347.4			404.5	24	38,647.2	18,573.9

[1] Enrollment numbers will depend on the ability of field staff to identify and locate producers, and whether producers choose to implement BMPs or monitor their water quality. Also, specific agricultural land uses and number of agricultural operations may change from year to year. Progress on enrollment, based on best available information, will be included in the annual BMAP report.
