County	Please provide any additional comments about the contents and completeness of your county's CENTRAX database. Use this space to clarify your answers above especially if the questions don't fit your county's circumstances.
Marion	We had 2 other older databases and very old paper permits that are not in any electronic database. Both of these databases have been uploaded to your FTP site.
Martin	
Miami Dade	Paper records which are available were found to be very helpful although they are kept in the form of a spreadsheet with the permit numbers,, date received, location address,date of inpection and result of inspection.
Monroe	
Nassau	
Okaloosa	
Okeechobee	
Orange	
Osceola	
Palm Beach	some records repeat, i.e. there would be separate records for a new system and a repair or an abandonment at the same property. we did not neccessarily link repairs or abandonments to the original permit, even if the parcel information was in the system already. So a single parcel may have multiple records.
Pasco	
Pinellas	Centrax was not used for tracking OSTDS
Polk	
Putnam	We have a data base that predates CENTRAX, but never was included in CENTRAX or Rehost Onsite Sewage Disposal Data Base
Santa Rosa	There are no records before 1994 some for 1994, complete from October 1995
Sarasota	
Seminole	
St Lucie	
St. Johns	Nothing before 1994.
Sumter	
Suwannee	Our centrax database is fairly accurate and complete for that time period
Taylor	
Union	
Volusia	
Wakulla	
Walton	We had two centrax databases for onsite sewage. One for all systems permitted out of the Defuniak Springs office and one for systems permitted out of the Santa Rosa Beach office.
Washington
