County	Did you put previously existing paper records into this electronic database?	Please provide any additional comments about the contents and completeness of this initial database.	Are there other related documents files from previous databases which were not added to EHD(rehost)?
St Lucie	SOME, a portion of the paper records	Rather than lose information when converting to Centrax, we took our previous dB program (Q&A) and exported them into 2 Excel spreadsheets: SEPTOLD covers from 1986 to 1989 (6827 entries) and SEPTANK covers from 1990 to 1998 (8228 entries). There were also paper permits going back to 1962 which, due to the lack of standardization and weaker rules, did not have sufficient information to be of any value and these were only used to determine a total count.	No
St. Johns	SOME, a portion of the paper records	Data base has permit number, name, legal and date	Yes
Sumter	the data base is limited in that only general location, type system, tank size, df size, owner name were listed it was then printed out on 11" x 17" paper. The electronic data base was corrupted and lost but the paper copy is available.		No
Suwannee			No
Taylor			No
Union	SOME, a portion of the paper records	the data base contained only the basic information: owner, dwelling type, tank size, drainfield size, installer, date installed, section, township and range	Yes
Volusia			No
Wakulla			No
Walton	Only list of permits with address if we had it and date installed.		No
Washington			No
