

City of West Melbourne

Central Indian River Lagoon BMAP

Draft Allocations April 2020

Summary:

- Used load estimation tool (LET) developed from SWIL model to calculate total nitrogen (TN) and total phosphorus (TP) starting loads for each total maximum daily load (TMDL) "Segment Group."
- Applied percent reduction from TMDL for each Segment Group (see tables below) to calculate total TN and TP load reduction required for each Segment Group.
- Used LET to calculate total anthropogenic starting load in each Segment Group and determine the percent each entity contributed to the total anthropogenic starting load.
- Multiplied the load reduction required in the Segment Group by the percent each entity contributed to the total anthropogenic starting load to calculate each entity's required reductions within each Segment Group.

Note: Numbers have been rounded for display in this document but were not rounded during the full calculation process.

Required Reductions Per TMDL Segment Group

BMAP	Project Zone	TMDL Segment Group	% TN TMDL Total Reduction	% TP TMDL Total Reduction
Central IRL	A, B, SEB	IR12-21	56%	48%
Central IRL	SIRC	IR-SouthCentral	36%	58%

New Load Calculations from SWIL Model

BMAP	Project Zone	TN (lbs/yr)			TP (lbs/yr)		
		Starting Load	Required Reductions	Allocation	Starting Load	Required Reductions	Allocation
Central IRL	A	38,079	27,275	10,804	5,577	3,253	2,324
Total		38,079	27,275	10,804	5,577	3,253	2,324

Draft Project Credit Recalculations

Using the LET and geographic information systems (GIS) tools, base loads for the project treatment areas were updated for all projects that require a base load for credit calculations. This allowed the project credits to be recalculated using the same foundation that was used for the updated allocations.

Current verified and completed projects:

TN (lbs/yr)			TP (lbs/yr)		
Required Reductions	Updated Project Credits	% Reductions Achieved	Required Reductions	Updated Project Credits	% Reductions Achieved
27,275	1,085	4%	3,253	341	10%

These credits represent the City of West Melbourne's status as of April 2020 – there will continue to be opportunities to submit new projects and obtain additional credits.

Notes:

- We could not locate a treatment area (TA) shapefile for projects **WM-23** and **WM-24**. Once we receive the TA shapefile for these projects, the reduction credits can be calculated and added to total reductions.
- Many projects are missing a project description and/or other information (see 'WM_STAR2019' tab in project workbook).
