

Lake Okeechobee BMAP Annual Meeting

February 9, 2021

Yesenia Escribano

Florida Department of Agriculture and Consumer Services

Office of Agricultural Water Policy

Florida Department of Agriculture and Consumer Services

Overview

- Agricultural Best Management Practices
- FDACS Role in BMP Implementation
- Producer Options in BMAP Areas
- BMP Implementation Verification
- Senate Bill 712
- Rule Revisions and BMP Manual Updates
- FDACS OAWP Legislative Report

Agricultural Best Management Practices

- Management strategies, tools and practices that improve water quality, conserve water, enhance soil health and protect water resources
- Based on the best available science and technology
- Must be technically and economically feasible
- Must balance production and water resource protection

Benefits of Agricultural Best Management Practices

- Increase efficiencies in nutrient, irrigation and water management
- Conservation and protection of water and environmental resources
- Promote climate resiliency and carbon sequestration
- Improve soil health
- Promote groundwater recharge

FDACS Role in BMP Implementation

- Develop BMPs in Manuals and adopt BMPs by Rule
- Assist Producers with BMP Enrollment
- Identify and support targeted cost-share of select BMPs
- Fund research to develop new BMPs and improve BMP effectiveness
- Verify proper implementation through site visits and record review

Producer Options in BMAP Areas

1. Sign an NOI and properly implement applicable BMPs for presumption of compliance, OR
2. Follow an FDEP or WMD-prescribed water quality monitoring plan at a Producer's expense

Highlights within the Lake Okeechobee BMAP

Subwatershed	Enrolled Ag Acres	Total Ag Acres	% Enrolled	Enrolled Irrigated Acres	Irrigated Acres	% Enrolled
East Lake Okeechobee	72,548	96,714	75	33,929	40,169	84
Fisheating Creek	196,019	212,924	92	17,420	19,563	89
Indian Prairie	193,467	230,158	84	55,338	65,449	85
Lake Istokpoga	102,740	126,096	81	47,470	52,309	91
Lower Kissimmee	225,819	262,529	86	23,904	24,072	99
South Lake Okeechobee	314,927	332,543	95	312,286	322,421	97
Taylor Creek/Nubbin Slough	130,110	148,198	88	11,889	12,998	91
Upper Kissimmee	196,780	281,102	70	40,321	45,959	88
West Lake Okeechobee	137,891	151,218	91	83,793	88,732	94

*Agricultural Acres based on the [Florida Statewide Agriculture Irrigation Demand \(FSAID\) geodatabase](#)

BMP Implementation Verification

- Process to verify the status of implementation of BMPs - required by 2016 law, strengthened by SB 712 (2020)
- Status of BMP implementation gathered from field staff site visits conducted on all enrolled farms, including record review
- Data utilized to track compliance and provide information for development of the required annual report to the Legislature
- Large workload - requires the assistance of enrolled producers and field staff working together

New SB 712 Requirements

- Implementation verification site visits to audit the proper implementation of best management practices by enrolled producers at least every two years
- Collection and retention of nutrient application records
- Transfer of nutrient application information to FDEP for utilization in BMAP assessment
- Development of a research plan to inform future LBR development beginning in the 2022 Legislative Session

New SB 712 Requirements

- During a verification visit, producer records are required to demonstrate compliance with the BMPs (Collect and Review)
- Certain records detailing nutrient application are required to be collected and retained by OAWP
- OAWP Rulemaking to standardize record retention across varied BMP manuals and recordkeeping processes (Nutrient Application Record Form)
- Nutrient application information is provided to the FDEP for utilization within BMAP assessment

OAWP Implementation of SB 712

- **BMP Research Solicitation**
- **Human Resources**
 - 8 additional FTEs
 - Prioritize IVs in targeted BMAPs
 - Update training and staff guidance on enrollment and implementation verification
- **Implementation Verification**
 - Record retention pursuant to IV visits initiated July 1, 2020
 - Development of NARF for utilization on IV visits to retain nutrient application information
- **Rule Making**

OAWP Implementation of SB 712

Producer Outreach

- FAQs Document
- Technical Assistance under development
- Video Assistance under development
- Continued collaboration with UF/IFAS Extension to raise awareness

Chapter 5M-1 Rule Revisions

- Update language for consistency with SB 712
- Definitions (5M-1.001)
- Implementation Verification (5M-1.008)
 - “collect and review” records for compliance
 - “collect and retain” NARF or substantially similar records
- BMP Implementation Assistance (5M-1.009)
 - Update timeframes for corrective action implementation and referral to FDEP for compliance/enforcement

Upcoming BMP Manual Revisions

- Revision of the 2008 Cow/Calf BMP Manual
- Manual has been initially verified as effective by FDEP
- Will require revision to Rule 5M-11, F.A.C. to adopt manual by reference

Upcoming BMP Manual Revisions

- Revision of the 2008 Sod BMP Manual
- Includes new 4Rs narrative in nutrient management section and reformatted BMP Checklist that contains all BMPs within three sections
- Manual has been initially verified as effective by FDEP
- Will require revision to Rule 5M-9, F.A.C. to adopt manual by reference

Adopted BMP Manuals

** Manuals to be developed – Hemp and Diversified Operations

Florida Department of Agriculture and Consumer Services

2020 FDACS Legislative Report

Florida Department of Agriculture and Consumer Services Office of Agricultural Water Policy

Status of Implementation of Agricultural Nonpoint Source Best Management Practices

July 1, 2020

Report to the Governor, the President of the Senate, and the Speaker of the House
Pursuant to Section 403.0675(2), F.S.

Publication No: FDACS-P-01924 07/20

Status of Implementation of Agricultural Best Management Practices (BMPs) Statewide

Enrollment and Response Summary	2019	Change from 2018
Total agricultural acres statewide	7,104,219	
Total agricultural acres enrolled	3,983,488	
Percentage of agricultural acres enrolled	56%	2%
Total irrigated acres	1,887,858	
Total irrigated acres enrolled	1,501,671	
Percentage of irrigated acres enrolled	80%	4%

Agricultural Acres Enrolled

BMP Manuals	Acres
Citrus	492,937
Conservation Plan Rule	189,104
Cow/Calf	1,422,515
Dairy	56,877
Equine	14,897
Fruit & Nut	17,423
Lake Okeechobee Protection Plan (LOPP)	29,610
Multiple Commodities	626,091
Nursery	33,047
Poultry	1,143
Row/Field Crops	1,065,884
Sod	33,344
Wildlife	616
TOTAL	3,983,488

Status of Implementation of Agricultural Best Management Practices (BMPs) in the Lake Okeechobee Basin

Enrollment and Response Summary	2019	Change from 2018
Total agricultural acres in the BMAP	1,586,350	
Total agricultural acres enrolled	1,378,535	
Percentage of agricultural acres enrolled	87%	11%
Total irrigated acres	669,128	
Total irrigated acres enrolled	606,528	
Percentage of irrigated acres enrolled	91%	4%

Agricultural Acres Enrolled

BMP Manuals	Acres
Citrus	127,644
Conservation Plan	147,877
Cow/Calf	529,017
Dairy	19,997
Equine	457
Fruit & Nut	733
LOPP	28,897
Multiple Commodities	94,561
Nursery	3,016
Poultry	79
Row/Field Crops	410,310
Sod	15,947
TOTAL	1,378,535
