

CHRISTMAS TREE COLLECTION DRIVE

Are you looking for an easy, environmentally friendly method of disposing of this years Christmas tree? Your Christmas tree can be cleanly and efficiently converted into household electricity.

From December 26, 2009 through January 10, 2010, Bay County Residents and businesses can drop their Christmas Trees off for processing at no charge.

Bay County Waste-to-Energy Facility 2 Trees
6510 Bayline Dr.
Bayou George

Bay County Fairgrounds 43 Trees
Sherman Avenue and U.S. 98,
Panama City

H.G. Harders Park
7900 John Pitts Road 2 Trees
Bayou George

Pete Edwards Field 70 Trees
7300 McElvey Road
Panama City Beach

The trees collected at these drop off locations will be used as fuel at the Bay County Waste-to-Energy Facility. Did you know that:

- **Waste-to-Energy facilities use waste products for fuel, such as household garbage and yard debris. This helps reduce our demand for fossil fuels and our dependence on foreign oil.**
- **The Waste-to-Energy facility converts household garbage and other waste into enough electricity each year to power approximately 47,000 average size residences.**
- **The Waste-to-Energy facility is an ecologically friendly process that produces very little atmospheric emissions, far less greenhouse gases than a conventional landfill and drastically reduces the amount of waste that we landfill each year.**
