Jonathan P. Steverson
Secretary

This survey is to identify water quality improvement projects that have a regional impact and will address nutrient loads towards meeting the Basin Management Action Plan (BMAP) and Total Maximum Daily Load (TMDL). Responses are due back to the department by February 29, 2016.

PROJECT

What is the name of the project? (If available, please use same name listed in Stormwater Master Plan)
Project Name:

Please provide a brief description of the project type.
Project Type:

What are the methods by which the project achieves water quality and/or quantity improvement?
Project Description:

When will the project begin and end?

Desired Start Date: Month Year Completion Date:

COST

How much will this project cost (total, estimated)?
Estimated Cost: \$

What are estimated Operation and Maintenance costs of this project on a yearly basis?
Estimated Annual O&M Cost: \$

LOCATION

Within which Basin Management Action Plan (BMAP) is the project located?

BMAP:

Please provide a description of this project's location (Sub-watershed, WBID, Zone, 8 digit HUC)

General Location:

What is the north-south position of this project in decimal degrees?

Latitude:

What is the east-west position of this project in decimal degrees?

Longitude:

PROJECT MANAGEMENT

Who is the main entity managing this project?

Lead Entity:

Who are the entities that will provide monies/effort towards this project?

Partners:

WATER QUALITY BENEFITS

How many acres are treated by this project?

Acres Treated:

What is the estimated Total Nitrogen (TN) reduction achieved per year in pounds?

Estimated TN Reduction: lbs/yr

What is the estimated Total Phosphorous (TP) reduction achieved per year in pounds?

Estimated TP Reduction: lbs/yr
