

**Upper Wakulla River and Wakulla Springs Basin Management Action Plan
Proposed Schedule for March – June Meetings
February 21, 2013**

March 21, 2013 Meeting

- Proposed basin management action plan (BMAP) boundary:
 - Complexity of groundwater flow patterns; and
 - Identification of priority restoration zones using the Wakulla County and Leon County (City of Tallahassee) Aquifer Vulnerability Assessments.
- Presentation of current nitrate levels and stream condition index (SCI).

April 18, 2013 Meeting

- Discussion of the Florida Department of Environmental Protection (FDEP) nitrogen isotope study in determination of significant nitrate sources (organic nitrogen versus inorganic nitrogen).
- Present the sufficiency of effort approach to evaluate projects and activities.
- Kick off collection of projects and activities for the BMAP.

May 16, 2013 Meeting

- Follow up on sufficiency of effort and project collection questions from the April meeting.
- Monitoring plan:
 - Objectives of the plan;
 - Sampling parameters and frequency; and
 - Proposed monitoring network.
- Research priorities for the first BMAP iteration.

June 20, 2013 Meeting

- Preliminary sufficiency of effort evaluation:
 - Comparison of projects submitted to sources identified in the most vulnerable areas.
- Review of BMAP sections and information that will be included.
