Moira,

Thanks for the update. Tiffany and I are working on reaching out to stakeholders for updates so no worries on that part.

Thanks,
Tina

Good morning!

I'm following up on a couple of items below.

- The District will be putting together a brief update on water quality for the Jesup meeting. I'm still waiting to hear back from them on projects in the main stem and upper areas (south/upstream of the Harney-Monroe) basin.
- I should have the loads summary done by tomorrow. I'm probably going to try to squeeze in a meeting with Kevin, Julie and Greg next week to talk to them about what I find out based on that analysis so we can have some talking points ready in case folks from Riverkeeper join us and have questions (I received an email from their Advocacy Director this morning, asking for the agenda, so it's a good possibility that they will be attending).
- Ben and I talked about the 4e/4b presentation and decided that we will tag team for that part of the agenda. We've asked Julie (Espy) for the slides she had for the presentation at Orange County last fall. We will also have a list of impaired waterbodies located in the Jesup and Harney-Monroe basins, and also any waterbodies that are on the TMDL priority list.
- Tina – were you going to reach out to folks about providing us with updates on projects? Just wanted to double check, so we don't double up on that effort.

A govdelivery reminder email with the draft agendas will be going out today.

Thanks!
Moira

Subject: Today's meeting/follow up/Harney-Monroe and Jesup

Moira,

Thanks for the meeting today to discuss the upcoming BMAP meetings, which we attended by phone. Attached please find draft agendas for your review. I added a map on each one to help folks tell the agendas apart, since they look so much alike.

The action items I noted are the following:

TG—Update the metrics workbooks for H-M and Jesup to provided updates on completed projects and new projects added.

TLB—Send draft agendas to MRH for review.

TG--Reach out to Jesup and H-M stakeholders with recent completed projects to see if they want to give a 5-minute update at the meeting(s).

MRH—Send map to team of areas being modeled by PLSM upstream of H-M. (completed) Work on a summary of upstream loads to share at the H-M meeting.

MRH—Reach out to Pam L-W about a possible water quality update in both basins and if they have project updates in the H-M basin to share.

TG/TLB—Start the PowerPoint docs with the summary statistics.

Corrections welcome.

Tiffany
