Re: Failure to register for and implement agricultural best management practices

Dear Mcz/Centrum Citrus Farms, L.L.C. Operator:

You are receiving this letter because you are listed as an owner or agent for an agricultural operation in Saint Lucie County. This property falls within the St. Lucie River & Estuaries basin management action plan (BMAP) and has also been identified by the Florida Department of Agriculture (FDACS) as containing an agricultural operation. A BMAP is a comprehensive set of strategies to reduce nutrient pollution entering the lakes, rivers, and streams that supply our drinking water, provide recreational opportunities for Florida residents and serve as habitat for Florida's wildlife. One of the ways a BMAP restores impacted watersheds is by limiting nutrient-rich discharges from agricultural operations through best management practices developed by FDACS and implemented by agricultural producers like you.

Agricultural best management practices are not difficult to implement and offer significant benefits to producers, including cost savings as a result of reduced use of fertilizer, water, and energy. Furthermore, enrolling in the program and implementing the applicable best management practices gives you a presumption of compliance with state water quality standards.

Section 403.067(7)(b)2.g., Florida Statutes, requires agricultural producers within a BMAP area to either register for and implement best management practices adopted by the FDACS, or, at your own expense, to conduct FDEP-prescribed water quality monitoring at your property that shows compliance with state water quality standards. FDEP has been notified by FDACS that you have not responded to their repeated efforts to assist you with bringing your property into compliance. They have forwarded your case to us for enforcement per Florida law; however, FDEP would certainly prefer to bring your property into compliance without taking further enforcement actions.

It is imperative that you promptly respond to this letter and immediately take action to come into compliance with state law. Within **15 days** of receipt of this letter, please contact Tammy Hinkle with FDACS at 352.796.7211 ext. 4320 or Tammy.Hinkle@FDACS.gov to make arrangements to sign up for best management practices at your property. If you have any other questions about this letter or the FDEP requirements imposed on agricultural operations within a BMAP area, please contact the division by phone at 850-245-8668 or via email at DEARinfo@floridadep.gov. We look forward to your prompt cooperation in resolving this matter.

Sincerely,

A handwritten signature in purple ink, appearing to read "Julie Espy".

Re: Failure to register for and implement agricultural best management practices

Dear Shadow Lake Groves, Inc Operator:

You are receiving this letter because you are listed as an owner or agent for an agricultural operation in Martin County. This property falls within the St. Lucie River & Estuaries basin management action plan (BMAP) and has also been identified by the Florida Department of Agriculture (FDACS) as containing an agricultural operation. A BMAP is a comprehensive set of strategies to reduce nutrient pollution entering the lakes, rivers, and streams that supply our drinking water, provide recreational opportunities for Florida residents and serve as habitat for Florida's wildlife. One of the ways a BMAP restores impacted watersheds is by limiting nutrient-rich discharges from agricultural operations through best management practices developed by FDACS and implemented by agricultural producers like you.

Agricultural best management practices are not difficult to implement and offer significant benefits to producers, including cost savings as a result of reduced use of fertilizer, water, and energy. Furthermore, enrolling in the program and implementing the applicable best management practices gives you a presumption of compliance with state water quality standards.

Section 403.067(7)(b)2.g., Florida Statutes, requires agricultural producers within a BMAP area to either register for and implement best management practices adopted by the FDACS, or, at your own expense, to conduct FDEP-prescribed water quality monitoring at your property that shows compliance with state water quality standards. FDEP has been notified by FDACS that you have not responded to their repeated efforts to assist you with bringing your property into compliance. They have forwarded your case to us for enforcement per Florida law; however, FDEP would certainly prefer to bring your property into compliance without taking further enforcement actions.

It is imperative that you promptly respond to this letter and immediately take action to come into compliance with state law. Within **15 days** of receipt of this letter, please contact Tammy Hinkle with FDACS at 352.796.7211 ext. 4320 or Tammy.Hinkle@FDACS.gov to make arrangements to sign up for best management practices at your property. If you have any other questions about this letter or the FDEP requirements imposed on agricultural operations within a BMAP area, please contact the division by phone at 850-245-8668 or via email at DEARinfo@floridadep.gov. We look forward to your prompt cooperation in resolving this matter.

Sincerely,

Julie Espy, Director

Agricultural best management practices are not difficult to implement and offer significant benefits to producers, including cost savings as a result of reduced use of fertilizer, water, and energy. Furthermore, enrolling in the program and implementing the applicable best management practices gives you a presumption of compliance with state water quality standards.

Section 403.067(7)(b)2.g., Florida Statutes, requires agricultural producers within a BMAP area to either register for and implement best management practices adopted by the FDACS, or, at your own expense, to conduct FDEP-prescribed water quality monitoring at your property that shows compliance with state water quality standards. FDEP has been notified by FDACS that you have not responded to their repeated efforts to assist you with bringing your property into compliance. They have forwarded your case to us for enforcement per Florida law; however, FDEP would certainly prefer to bring your property into compliance without taking further enforcement actions.

It is imperative that you promptly respond to this letter and immediately take action to come into compliance with state law. Within **15 days** of receipt of this letter, please contact Tammy Hinkle with FDACS at 352.796.7211 ext. 4320 or Tammy.Hinkle@FDACS.gov to make arrangements to sign up for best management practices at your property. If you have any other questions about this letter or the FDEP requirements imposed on agricultural operations within a BMAP area, please contact the division by phone at 850-245-8668 or via email at DEARinfo@floridadep.gov. We look forward to your prompt cooperation in resolving this matter.

Sincerely,

Julie Espy, Director
