Subject: Triennial Review of Florida's Water Quality Standards

Dear Official,

As a waterfront homeowner in Stuart, I'm disgusted at the continuing demise of water quality since growing up 50 some years ago. Now I have grandchildren that I'm frightened for them to be in contact with the St Lucie water. I don't want them walking on my shoreline or getting in kayaks, and forget about swimming. Let's make Floridians health the primary focus and the hell with subsidized sugar.

Please adopt the 2016 EPA draft recommended water quality criteria of 4 micrograms per liter for microcystin and 8 micrograms per liter for cylindrospermopsin to best protect recreational users and restore Florida's imperiled waters.

Sincerely,
Bill Baldwin
Stuart FL
