Subject: MARTIN COUNTY FLORIDA WATER QUALITY

My wife and I both are 77. She enjoys daily swims in the intracoastal waterway system and the river systems here in Martin County. Pollution from septic systems and Lake O releases have made it impossible to do this on many occasions during the past few years. A wonderful resource and a great way to keep my wife healthy has been destroyed. Property values have suffered. The fishery hurt. Public health emergency. Please help us.

Thank you, Bill Cole, 7074 SE Yellowwood Lane, Stuart, FL 34997
