Subject: Eliminate Toxic Algae from our Waters

Dear Ms. Sutton,

As a Resident of the Treasure Coast with relatives in Cape Coral I beg you to embrace Congressman Mast's plans to improve our Oceans and Estuaries. For too many years we have suffered from Lake Okeechobee's toxic discharges; damaging our health and our Economy. Beaches routinely closed, no fishing, flesh-eating bacteria leading to Death, the loss of Tourism dollars, and Water-based businesses going bankrupt. Not this year, thanks to Congressman Mast's plans. We must adopt and implement plans to eliminate discharges from Lake O and move forward rapidly with Everglades Restoration, reversing the 30 year deal Rick Scott gave Big Sugar. Aquatic species, wildlife, and human beings are dying for profit. I ask you to put Planet over Profit for Lobbyists.

Respectfully,
Bonnie Lee Alford
