Subject: Please Protect our Health

This is my sincere plea asking the Department of Environmental Protection to establish strict numeric standards for cyanotoxins to protect public health.

We, the people, the sea life, the birds, the whole environment are at the mercy of those who have been appointed and elected to protect our health and well-being. I trust that you will do the right thing for our families and for your family, for generations to come. Thank you in advance of a healthy change for a more hopeful future.

Sincerely,
Carolyn Kaufman
Cape Coral FL
