Subject: St. Lucie River

Dear Ms. Sutton:

My wife and I have lived on the St. Lucie River for 25 years and have watched our beautiful waterway being destroyed by the federal government. With the dedicated attention of Congressman Brian Mast our precious resource has been making a comeback due to the lack of discharges from polluted Lake Okeechobee. The crisis has now been elevated to a human and pet health issue. I realize that the task of cleaning the river and estuary is monumental but at least it has begun. Once the discharges are permanently stopped the next step to remove decades of polluted muck from the river bottom must begin.

I encourage you and the US Dept. of Environmental Protection to continue to vigorously assist and fully support our river communities in this effort.

Thank you.

Yours truly,
Dr. & Mrs. Charles Farrow
Stuart FL
