Subject: DIRTY BEACHES

Dear Ms. Sutton,

My name is Claudia Postigo and I have owned a home at The Ocean Club in Key Biscayne since 1997 (22 years). My children have grown up spending incredible summers, winters and what not, on the Key since they were born. It was Island Paradise. Two years ago, I decided to finally move to Key Biscayne permanently, only to find the beach became unfit to swim in because of many reasons. Some of them were natural, seaweed, crocodiles...and those are things that we have to cope with because they come with the territory. But what I find unacceptable, is the amount of feces and/or chemicals in the water!!! I actually moved to New York City because my children always wanted to go to the beach and there was always an advisory! What was the point of living on the Key if they could rarely go to the beach?

I find that unacceptable and honestly hope you can push for action to preserve Florida beaches. For the sake of everyone. Most residents cannot just pick up and leave, and are stuck with the situation.

Thank you very much,
Claudia Carrillo-Postigo
