Subject: Triennial Review of Florida's Water Quality Standards

Dear Ms Sutton: Please adopt the 2016 EPA draft recommended water quality criteria of 4 micrograms per liter for microcystin and 8 micrograms per liter for cylindrospermopsin to best protect recreational users and restore Florida's imperiled waters.

I've seen the results of not having these standards in effect here in Wisconsin. Most of the summer the Red Cedar River is terribly damaged by cyanobacteria. Please work hard to prevent Florida from becoming polluted. I am a "snowbird". I spend the winter near Tallahassee and hope to continue to find clean water when I'm there. Thank You.
