Subject: Algae Bloom

Hello Senator Mast,

One other time about a year ago I suggested that you get skimmers and put them at the lake and pick up all the algae and process it for Bio Fuel you can use the land I believe that is about 10 acres next to the spillway that empties into the St. Lucie River or locate it down river this way you can fill tankers and county vehicles can use this fuel, this way it would save on the Taxes For the counties as well as expense for running busses and work trucks for the county.

Recently I saw a ad on TV where Exxon Oil was going to be doing this so why couldn't the, State of Fl. we had some friends that were doing this in Texas with all rules in place and Obama Shut them down not sure for the reason. He closed a lot of plants (processors).

Best Regards,

Dave

The advertisement is set against a blue background with a white circuit-like pattern on the left. In the top left corner is a circular logo with the letters 'IPS' in red. The main text is in red and black, announcing a 'NEW PRODUCT'. It describes a '4" PLASTIC SCRAPER & 1 DOUBLE EDGED INDUSTRIAL BLADE' with part numbers 'ACC-IPS-SCRIP-KIT' and 'ACC-SAFETY BLD RED'. Below this, it states the product is 'DESIGNED TO FIT THE PALM OF YOUR HAND' and lists the sale price as '\$6.70EA. 4" SCRAPER/BLADE' and '\$9.49EA. (25PK OF 4" INDUSTRIAL BLADES)'. On the right side, there is a white rectangular box containing the 'SheerForce' logo (a red stylized 'S' and 'F' inside a circle) and an image of the black scraper tool with a red blade. A red starburst with the word 'NEW' is placed over the blade.
