Subject: Algae Blooms

Toxic algae blooms have been linked to liver disease and neurological disorders in people and blamed for killing and sickening dogs.

The state's blue green algae task force created by Gov. Ron DeSantis calls for limits on the toxic algae. This October, the task force concluded a six-month review recommending limits as well as increasing research into the chronic and acute health affects from exposure to algae.

Please fight for cleaner water standards for our inhabitants and for all who come to enjoy our beautiful state.

Thank you,

Dolores Guarino
