**Subject:** Water quality

There is no excuse or the polluted water system from Orlando to Okeechobee, To the Atlantic and the Gulf of Mexico. Only clean water should be added to our natural rivers and the lakes household septic, farms, rancher's, Developers and sugar farmers Must Upgrade their discharges and drainage. Do not pump the water back into the lake, clean it and send it to the Everglades where it is needed!

All the best,  
Frank McSpedon
