Subject: Water Quality Limits for Florida

Dear Kaitlyn,

Let's make Florida a leader for the nation and establish water quality limits on toxic algae. Our water systems in Florida need much improvement for the health of our citizens and wild life and the beauty of our State. We cannot wait any longer; time is running out. Catering to the needs of big sugar, businesses like Mosaic and out of control farming will eventually benefit no one as the State will become destroyed and desolate. We also need to put back into law inspections of septic systems and other water management systems.

I hope you will find that water quality limits are a must for Florida!

Thank you for your attention to this matter.

Grace Viola

Resident of Lakeland and Longboat Key Florida.
